SUMMARY

Full-stack engineer with 7 years of experience in React, TypeScript, Python and Go, building monitoring platforms, speech-to-text pipelines and RAG-based AI tools. Most of my career has been offshore work with US teams, so async collaboration across timezones is routine.

SKILLS

Frontend: React, TypeScript, JavaScript, Redux, Next.js, three.js, Gatsby, Apollo GraphQL, Material UI, Jest
Backend: Python, FastAPI, Django, DRF, Node.js, Go, PostgreSQL, REST APIs, GraphQL
AI/ML: RAG, LlamaIndex, Qdrant, OpenAI, Azure OpenAI, Whisper, Whisper.cpp, model fine-tuning, FFmpeg
DevOps: AWS, Azure, Docker, nginx, Linux, Jenkins CI/CD, WebRTC

EXPERIENCE

Contract Full-Stack Engineer, CS Technology LLC (client: Ferroglobe, US) Apr 2026 - Present

- Built a plant health monitoring platform for US manufacturing plants: Python heartbeat agent checking every service each minute, live status dashboard, incident tracking, maintenance windows and per-service email alerts (React, FastAPI, PostgreSQL)
- Built MES Assist, a no-code AI chatbot platform with RAG and a data agent (LlamaIndex, Qdrant) that answers from documents, runs read-only SQL and renders live plant data in 11 chart types
- Shipped the chat widget as a Shadow DOM bundle embeddable with one script tag, with per-bot LLM choice (Azure OpenAI, OpenAI, OpenRouter) and JWT-verified data access
- Served admin panel and widget same-origin behind nginx in Docker, removing CORS and exposed-port issues; maintained a legacy Django and React TypeScript app

Full-Stack Engineer, Isha Foundation Jul 2024 - Dec 2025

- Built Whisper speech-to-text pipelines (FastAPI, React), adding Tamil transcription via Whisper.cpp with FFmpeg chunking
- Fine-tuned Whisper on 400+ hours of audio; added a GPU task queue so concurrent jobs stopped degrading each other
- Automated transcription to Confluence and Jira, and built a batch subtitle (.srt) tool and a Confluence page diff tool

Web Volunteer, Isha Foundation Jun 2023 - May 2024

- Maintained the React website; built reports with Google Apps Script and Looker Studio

Software Engineer, Ibexlabs (Labra.io, US) Apr 2021 - Oct 2022

- Owned the ConnectWise CRM integration end to end for an AWS Marketplace SaaS product
- Full-stack work in TypeScript, React, Redux and Jest, with Go and Python APIs on PostgreSQL

React.js Developer, SupportGenie Mar 2019 - Mar 2021

- Sole frontend developer: migrated the marketing site from AngularJS to Gatsby, moved REST to Apollo GraphQL, built a WebRTC video chat app
- Set up Jenkins CI and Docker containers; real-time ticket updates with Autobahn pub/sub

Earlier: JavaScript Developer Intern, Actionable Science (2018-2019, React chatbot UI) | Backend PHP Developer, Axel Web Technology (2016, CakePHP)

PROJECTS

- **AI Log Analyzer and Auto-Debugger** (open source): Python agent that catches multi-service crashes, traces root cause and sends Slack/email alerts with a proposed code fix. Python, OpenAI, FastAPI. github.com/lakshyak789/AI_log_analyzer
- **AI Call and Interview Copilot** (open source): real-time call assistant using Whisper, screenshot-to-React code, and resume-based interview questions. Python, React, WebRTC. github.com/lakshyak789/AI_meeting-copilot
- **Chess Battlefield:** 3D browser chess with animated pieces, Stockfish WASM AI and peer-to-peer WebRTC multiplayer, mobile-ready. three.js, WebGL. chess.lakshya.space

EDUCATION

Master of Computer Applications (MCA), Chandigarh Engineering College 2016 - 2018

Bachelor of Computer Applications (BCA), Lovely Professional University 2012 - 2015
